Automatic Urinal Valve

Code 1109:

Touch Free Automatic Urinal Valve, chrome finish.

Specifications:

Hose dia: 1 inch. Water pressure: 0.5-7 kgs/cm³

Power: DC6V CR-P2 Lithium Battery. Battery life: About 4 years (or 200,000 flushes), CSA appr.

Sensor detecting distance: Under 60 cm/Urinal.

Safety distance from sensor to the front wall: 200 cm/Urinal.

Auto flush mode: pre-flush/ 2 seconds, main flush/ 4 seconds.

Outlet pipe dia: 1-1/4 inch.

Material: Brass.

Features:

Automatic by infrared sensor. Multi-functions flush by mechanical, manual push button and automatically by sensor detecting. More safety with lithium battery. Low power consumption, the battery can be used about 4 years or 200,000 flushes.

Green/ operation indicating light. Red/ low power indicating light.

Water filter is cleaned automatically. Water volume will not be reduced by a dirty filter.

Water proof.

Fast installation: can be re-placed with Sloan or Zurn manual flusher.

The module type parts designed assure easier and faster maintenance.
